Project Title: **CREATE A REEL DESIGN USING CANVA.**

1.INTRODUCTION

1.1 overview

To create a Reel design using Canva, start by signing in or creating an account on Canva's website. Once logged in, click "Create a design" and set custom dimensions (typically 1080x1920 pixels for Instagram Reels). Design your Reel cover using Canva's templates, background options, text styles, and graphics. You can also upload images or videos. Customize elements by adjusting their size, position, and style. Arrange layers to your liking. After completing your design, click "Download" to save it to your computer. To use it on Instagram, upload it as the cover when creating or editing your Reel. Keep in mind that Canva's features and interface may have changed since my last update, so explore the platform for the latest tools and resources.
